

for aian head start

for aian head start teachers

aian head start classrooms serve tribal communities. tiny signals describes the situation, never a label on the child, and never assumes what the child calls the teacher. the writing layer is built for respect first.

how the writing works

- no judgmental labels for children. no fabricated detail. the teacher's own words are mirrored, not replaced.
- the form of address the teacher uses is the form of address the writing uses. nothing is assumed.

what it covers

asq, deca, daily handoffs, conference write ups, incident notes. the same writing layer used in other head start classrooms.

what it is not

not a curriculum, not a replacement for tribal child care reporting, not a system to install.
