

for head start and early head start

# for head start and early head start teachers

head start classrooms run on asq-3, asq:se-2, and deca, plus a steady current of family handoffs, conference notes, and incident write ups. tiny signals carries that writing layer in plain, family-ready language.

## the assessment side

- asq-3 and asq:se-2 prompts by age window, with a family letter a parent can actually read.
- deca strengths language for the social-emotional side, written without behaviorist labels.

## the daily side

one minute end of day handoff. structured incident log. fifteen-minute conference write up. iep and 504 friendly notes for children with a plan.

## what it is not

not a child plus system, not a replacement for chsa or ohs reporting. it is the writing layer that sits next to those tools.
