

for california state preschool

for california state preschool (cspp) teachers

cspp classrooms run on drdp-2025 and on a lot of writing that no system handles well: the conference summary, the calm incident note, the daily handoff at pickup. tiny signals is the writing layer that sits next to drdptech.

the drdp side

drdp-2025 measure language in plain words for the measures teachers rate each week. evidence sentences a teacher can paste into drdptech without rewriting.

the family side

asq-3 and asq:se-2 prompts by age window with a family-friendly summary, a one minute end of day handoff, and a fifteen-minute conference write up.

spanish mirror for family-facing writing, built for dual language learner classrooms.

what it is not

not a replacement for drdptech, not a child information system, not a curriculum. no county contract is required for a teacher to try it.
